About me

Student of the Web Design and Development career at the School of DaVinci Multimedia Arts.

My main strengths are teamwork, creativity and proactivity to solve problems.

I am a person motivated and determined to demonstrate my abilities on web programming techniques and design to contribute to the growth of a project or a company.

I like to constantly learn, not only in the career that I am studying, but also with courses on YouTube, tutorials and every source where I can incorporate new knowledge so I can apply them to my projects or any challenge that comes my way.
